: STEM skills for Humanities

Last Meeting and Project Results

On 20 and 21 October, Mykolas Romeris University (MRU) in Vilnius, Lithuania, hosted the International Conference "STEM and the Humanities: Innovation and Social Change", the final event of the European project STEM Skills for the Humanities (Erasmus+ KA220-HED).

The initiative represented a moment of synthesis and reflection on the results achieved by the consortium and on future prospects for international collaboration in the field of interdisciplinary education.

Project's recent highlights :

Final Transnational Project Meeting

STEM4Humanities International Conference

STEM E-Internship with Companies

Dissemination & Outreach

STEM 's Last Meeting

During the day of October 20th, the project partners gathered for the final meeting, dedicated to taking stock of the activities carried out and defining the final dissemination strategies.

The main results of the Work Packages were presented, with particular attention to the STEM mini-course for humanist teachers, the guidelines for the integration of scientific skills into humanistic curricula, and the awareness-raising activities carried out in the various partner countries.

The meeting concluded with a networking moment and a cultural tour of the city of Vilnius.

International Conference “STEM4Humanities for Innovation and Social Change”

On 21 October, the MRU hosted the interdisciplinary academic conference STEM4HUMANITIES-ISC2025, which brought together researchers, teachers and professionals from across Europe. The objective of the event was to explore how the convergence between STEM disciplines and humanities can stimulate innovation, strengthen collaboration between universities and encourage the social impact of university education, through implementations of online internships, with small and medium-sized businesses in the area.

Outcomes and Future Perspective

During the conference, project partners shared the final results of the work carried out over the two years of collaboration, discussing good practices and future challenges for the dissemination of STEM skills among humanities lecturers and students.

The event confirmed the relevance of STEM4Humanities as a pioneering initiative for the integration of technology, education and humanistic culture in Europe.
